

Student-led Projects

We have around 30 student led projects. These are set up, organised and run entirely by students. They provide a great opportunity for you to work with other like-minded students and make the decisions about how you and your project work towards benefiting your local community. You can also become a project coordinator, enabling you to develop additional skills such as leadership, volunteer management and activity planning skills.

Back 2 Schoolz

One-Off Projects

We often have lots of one-off projects, which are great if you want to give volunteering a go or don't have time to commit to something on a regular basis. These range from marshalling at a sports event, to stewarding at an arts festival, to running a fundraising stall, to being part of a community taskforce team. Please contact us to find out about the current one-off opportunities you can sign up to.
